AFFIDAVIT OF CUSTODIAN OF RECORDS

STATE OF ARIZONA)
) ss.
County of MARICOPA)

The undersigned hereby declares, under oath, that the following statements are true:

1. I am over the age of eighteen, suffer no legal disabilities, have personal knowledge of the facts set forth below, and am competent to testify.
2. I am the duly authorized Custodian of Records of _____
WEST MINING AND FOUNDATIONS INC
3. I have the authority to certify said records.
4. The records submitted herewith are true copies of all records under my possession or control responsive to the Subpoena directed to the Custodian of Records of the entity identified in paragraph 2 above.
5. The records were prepared or obtained by personnel or representatives of the entity or persons acting under the control of personnel or representatives of the entity identified in paragraph 2 above in the ordinary course of business at or near the time of the act, condition, or event in said records.
6. The records are kept in the course of regularly conducted business pursuant to the regular practice of the entity identified in paragraph 2 above.

L. P. West
Custodian of Records

Response to Subpoena for Document Production
Re: West Mining and Innovations, Inc.

Avison C. West responding as sole source of records for West Mining and Innovations, Inc, and acting as the Custodian of Records, for subpoena served upon him March 13, 2009.

Incorrect assumptions have been made to the size and scope of the corporate entity in this matter, so I will respond to requests for documents described in "Exhibit A" number by number as to any, if at all, records exist, to the best of my ability.

1. Articles of Incorporation exist only and a copy is included;
2. There are no employees past or present;
3. There are no records in existence of salaries, commissions, reimbursements, distributions, draws, loans, or any other compensation, whether monetary or otherwise, paid to any individuals for the marketing, offer or sale of preferred stock, stock certificates or instruments;
4. Northern Michigan University, Marquette, MI. 1972-73 (no degree); Flint Radiological Nuclear Institute, Flint, MI 1975(no degree); Grand Valley State University, Allendale, MI. 1977(no degree); Universal Life Church, Modesto, CA Grad 2008 (Ordained minister and Doctor of Divinity degree – PhD); Canterbury University, Hyde, Cheshire, U.K., Grad 2008 (Doctor of Science degree in Geology –D.Sc.)
5. There are no documents in existence submitted for the purpose of compliance, reporting, seeking exemptions from registration with any state or federal securities agency;
6. There are no documents in existence concerning or related to mining, mineral rights, precious metals, and the like, submitted to, filed with, and received from the State of Arizona or Federal governmental agency, including but not limited to, documents submitted for mineral leasing mining claims and copy of permits obtained or claims staked;
7. There are no documents in existence of all accounting records and books of original entry including but not limited to, cash receipts journal, cash disbursements journal, sales journals, general journal, subsidiary journals, general ledger, subsidiary ledgers, and chart of accounts. If this information, which does not exist, is contained within Quickbooks, which is assumed to be some sort of computer software, which is not owned by either respondent, a copy of all such relevant files in .qbw or .qbb format will suffice, but again do not exist;
8. There are no documents in existence of bank or other depository institution accounts in the name of, or for the benefit of, WM&I whether open or closed, including: (a) the name of the bank or depository institution and address of the branch at which the account is located; the name and number of each account; and (c) the names of all signatories on each account;
9. Craigslist postings included. That is the extent of advertising;

ACC000110
FILE #7998

10. No information, with the exception of information sent to and received from . Robert Jackson assumed to be the "offeree" Robert Eckert, was provided through the internet concerning WM&I including, but not limited to, copies of all web pages, addresses of web sites, links and attachments, videos, and email addresses;
11. Only Robert Jackson, a fictitious name assumed to be used by Robert Eckert as "offeree", with an address given as [REDACTED], Phoenix, AZ [REDACTED] Phone number [REDACTED] had been told of the added security offered to an investment into WM&I preferred stock would be GIVEN with a redemption period of 180 days for 100 pounds of gold. It was not a stock sale or purchase in any manner with any cash repayment or dividend whatsoever discussed, not even a number of shares at any value;
12. No amounts were ever invested by anyone, on any date, into WM&I;
13. There were never any documents created relating to an individual or entity in number 11 except email correspondence that concluded with an electronically signed Nondisclosure Agreement and a Project file. There were NO other contracts, forms, subscriptions, agreements, notes, questionnaires, records of investment statue, checks, wire transfers, receipts, account statements, tax information;
14. Only Robert Jackson, a fictitious name assumed to be used by "offeree" Robert Eckert, was given a Nondisclosure Agreement to sign and then after he electronically signed it, was sent a Project file. No other documents regarding the current or proposed activities were created;
15. There are no sites, locations, and properties that have been or is in the process of being staked, claimed, or mined as discussed and disclosed by WM&I to any actual or potential investors other than the Vulture mine and then only to Robert Jackson assumed to be "offeree" Robert Eckert. Said mine is currently for sale.

**ARTICLES OF DISSOLUTION
BY INCORPORATORS OR INITIAL DIRECTORS**
Pursuant to A.R.S. §10-1401

1. The name of the corporation is WEST MINING AND INNOVATIONS, Inc
2. The corporation was incorporated on the 22nd day of JANUARY, 2009
3. ☒ None of the corporation's shares have been issued.
☒ The corporation has not commenced business.
4. No debt of the corporation remains unpaid.
5. If shares have been issued, the net assets of the corporation remaining after winding up have been distributed to the shareholders.
6. A majority of the initial directors or of the incorporators have authorized the dissolution.

**CORPORATION COMMISSION
FILED**

**ARTICLES OF INCORPORATION
OF**

JAN 23 2009

Pursuant to A.R.S. §10-202
(An Arizona Business Corporation)

ARTICLE 1

The corporate name must contain a corporate ending which may be "corporation," "association," "company," "limited," "incorporated" or an abbreviation of any of these words. If you are the holder or assignee of a trademark, attach trademark certificate.

FILE NO. 15X1838

The name of the Corporation is:

WEST MINING AND INNOVATIONS, INC.

2. Initial Business:

The Corporation initially intends to conduct the business of:

Legal recovery and refining of precious metals

along with ongoing research and development of non-traditional mining methods

3. Authorized Capital:

The Corporation shall have authority to issue 11,000 shares of Common Stock.

4. Known Place of Business: (In Arizona)

The street address of the known place of business of the Corporation is:

1729 E. Pony Ln

Gilbert, Arizona 85295

ARTICLE 3

The total number of authorized shares cannot be "Zero" or "Not Applicable."

ARTICLE 4

May be in care of the statutory agent.

ARTICLE 5

The agent must provide a physical address. If the statutory agent has a P.O. Box, then they must also provide a physical description of their street address/location. The agent must sign the Articles or provide a consent to acceptance of the appointment.

5. Statutory Agent: (In Arizona)

The name and address of the statutory agent of the Corporation is:

Avison C. West

1729 E. Pony Ln

ARTICLE 6
A minimum of 1
director is required.

6. Board of Directors:

The initial board of directors shall consist of 2 director(s). The name(s) and address(es) of the person(s) who is(are) to serve as the director(s) until the first annual meeting of shareholders or until his(her)(their) successor(s) is(are) elected and qualifies is(are):

Name: AVISON C. West
Address: 1729 E. Pony Ln
City, State, Zip: Gilbert, AZ 85295

Name: Barbara M. West
Address: 1729 E. Pony Ln
City, State, Zip: Gilbert, AZ 85295

Name: _____
Address: _____
City, State, Zip: _____

Name: _____
Address: _____
City, State, Zip: _____

The number of persons to serve on the board of directors thereafter shall be fixed by the Bylaws.

ARTICLE 7
A minimum of 1
incorporator is
required. All
incorporators must
sign both the
Articles of
Incorporation and
the Certificate of
Disclosure.

7. Incorporators:

The name(s) and address(es) of the incorporator(s) is (are):

Name: AVISON C. West
Address: 1729 E. Pony Ln
City, State, Zip: Gilbert, AZ 85295

Name: Barbara M. West
Address: 1729 E. Pony Ln
City, State, Zip: Gilbert, AZ 85295

All powers, duties and responsibilities of the incorporators shall cease at the time of delivery of these Articles of Incorporation to the Arizona Corporation Commission.

8. Indemnification of Officers, Directors, Employees and Agents:

The Corporation shall indemnify any person who incurs expenses or liabilities by reason of the fact he or she is or was an officer, director, employee or agent of the Corporation or is or was serving at the request of the Corporation as a director, officer, employee or agent of another Corporation, partnership, joint venture, trust or other enterprise. This indemnification shall be mandatory in all circumstances in which indemnification is permitted by law.

9. Limitation of Liability:

To the fullest extent permitted by the Arizona Revised Statutes, as the same exists or may hereafter be amended, a director of the Corporation shall not be liable to the Corporation or its stockholders for monetary damages for any action taken or any failure to take any action as a director. No repeal, amendment or modification of this article, whether direct or indirect, shall eliminate or reduce its effect with respect to any act or omission of a director of the Corporation occurring prior to such repeal, amendment or modification.

\$50K Investment for 100 POUNDS of PURE REFINED GOLD

Reply to: serv-1055054778@craigslist.org [Errors when replying to ads?]
Date: 2009-02-28, 9:36PM MST

I am a geologist, with a doctorate in geology specializing in precious metals recovery, that needs \$50,000 for a new gold recovery project that will include taking advantage of the new government stimulus spending package.

Part of that stimulus package is sending billions of dollars of government money into contracts for reclaiming and sealing off old dangerous abandoned mines, of which Arizona has well over 1000 to cap and seal.

I KNOW how to not only reclaim the precious metals STILL awaiting recovery from many LARGE abandoned gold mines, but also how to close and seal mine shaft sites too.

I have formed a new AZ mining corporation , and it is perfectly positioned to go after and win those solidly backed large government contracts.

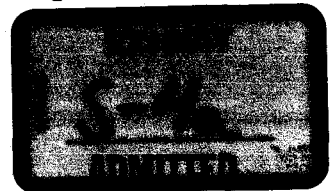

The investor, or investors, will receive share(s) of Preferred Stock in my Arizona corporation which will be redeemed within 180 days of investment with BARS of REFINED gold bullion of at least 99.99% purity equaling a total TROY weight of 100 TROY POUNDS (1400 troy ounces).

Even at a LOW value of normal SPOT gold price of just \$500.00 an ounce, that would equal \$700,000.00 in dollar value.

In this world economy, the chances of Gold even getting close to \$500.00 an ounce is most improbable.

More likely, that in 6 months, the ounce spot price will be closer to surpassing \$1000.00 an ounce.

ACC000115
FILE #7998

(Feb 27, 2009 17:14 NY Time gold spot price was \$940.60 That would have paid you \$1,316,840.00 at today's prices for the \$50,000 investment!)

But, again, figuring at a low of \$500.00 an ounce, \$700,000.00 is a tremendous return.

And, it's a heck of a lot better and safer than the stock market.

I am issuing Preferred Stock as it gives the investor a bit more of a security blanket, in that in the HIGHLY unlikely event of a corporate collapse, any and all Preferred Stockholders are paid first out of liquidated assets.

However, since I only need to raise \$50K, there will be few, perhaps only one, actual Preferred stockholders.

So, it is not like there would be hundreds of shareholders standing in line. Again, this is just being done as a courtesy on my part.

This is NOT a complicated offer.

The high return is for prompt action in making the investment.

No game playing, no B.S.

You will be given regular updates, and you can witness recovery and refining processes - as they occur - right here in the Phoenix area, and see your 'return' being accumulated.

If you are out of state, I am sure we can set up a web cam that you could have "live feed" access to.

If you want the security of a bank savings account, but still earn this great return, then do not bother to reply.

Keep your money in the bank...a REAL safe place now that bailouts are being made!

And, of course, earn THEIR pittance of an interest rate.

If you want THIS return, however, take a "risk" in a commodity like gold that is valued AROUND THE WORLD (not like our American dollar), and for this "risk" receive an awesome return!

Only serious and qualified inquires will be responded to.

No more tire kickers or people who either don't have the cash; get their cash

illegally (like those gifting programmers); try and get the high return but not take ANY risk.

I've gotten responses like those above recently from my previous Craigslist posting, and it is pathetic!

I am NOT looking for some long, drawn-out "broker-try-and-find-me-some-money" type of thing.

Simply, I am seeking a private investor, or multiple investors, that can move - and move now.

I have some access to some extremely rich gold reserves that are prime to tap.

THAT is why I am willing to recover, refine, and pour the extra 100 POUNDS of gold bars as a GREAT RETURN on this investment.

The investment capital is to be used to acquire a shop; some additional equipment to what I already have; and the operating capital to bring in the primary material to extract and process the gold from.

This will also be the base project for the reclamation and closure process of abandoned mines here in AZ that the government contracts will be sought.

This is HIGH-TECH science-based gold recovery, not old-fashioned "hope-I- hit-something" method.

This is about as safe as it can get for an investment that can return so much.

You are dealing in a commodity (GOLD) that is so very strong, and will REMAIN strong and ALWAYS be LIQUID in the WORLD economy.

You are dealing with a person who has more knowledge and experience (over 25 YEARS in the field) in this science and industry that you can ever imagine.

If you have the cash, and are ready to act on this NOW, then email me and I will contact you.

(This can be one investor for the entire \$50k, or 50 investors with \$1K....the ratio is 2 POUNDS of GOLD for each \$1K invested. That is 28 troy ounces x the going Gold Spot rate....NOT to go below \$500 a troy ounce minimum.)

Thank you for your time and attention.

 Mr. West,

My apologies for not getting back to you sooner, but I needed to attend some other family related matters in California. I do hope all is ok with your wife and she was able to return home with you last night. Unfortunately, I'll be in So. Cal for the next day or two so the earliest I will be able to meet will be Monday or Tuesday of next week. If your investment opportunity can wait till then, great. If not, as a business man I understand. However, if you're still interested, maybe you can send me some detailed information about your project as I like good, interesting reading? Also, if there's anything you need me to sign I would be more than glad to give you that commitment at this point.

Anyway, although I'm away from Phoenix right now, I'll still be checking my email periodically. Thanks

Rob

Rob, (do you go by Rob, or RJ? The RJ shows up in the return mail address)

First of all, thank you for your response and filling me in.

I also wanted apologize for not getting back to you sooner. I had to take my wife to the ER at Banner Gateway Hospital. In fact she is still there, but hopefully I can go back in an hour or so to get her. I had to come home and feed our dogs (coker spaniels), and check my email.

She is doing physical therapy for her knees that she had some surgery on late last fall, and this afternoon, her leg hurt enough to where the therapist thought she might have a blood clot. So they called our primary care doctor and he wanted her to go to the ER and get checked out.

So, anyway, she has undergone a bunch of tests...one blood test came back positive...so she had to get a CT done too.

They are waiting on the results as I type this...but the thoughts are leaning to that the blood test was a false positive.

Hope so...

If you would like to get together tomorrow, just name the time and place you would like to meet.

I live in Gilbert, but can travel to wherever in the valley you would feel comfortable. Maybe somewhere where we could have a light lunch while we talk and go over the proposal/project. I am confident that you will see our mutual benefit possibilities. I am also confident that you will find that if you do come in on this project, you will witness some fascinating operations that you never new existed in the recovery of gold. Remember, this is high-tech stuff!

Let me know what time and where to meet you.

Update: (9:40) My wife just called, and the CT was ok...but they want to xray her knee because of the pain, so, I am going to be heading over there. They said she will come home tonite, but of course, it will take a couple of hours probably to get the xray results back before they cut her loose.

So, I will look forward to your email when I get home.

Mr. West,

Well, let me take this opportunity to say thank you for the quick response. Let me also attempt to answer a few of the questions you had of me. First, I'm not retired, I'm more of an entrepreneurial business man who is self employed. I've never been involved in any type of mining investments or mining prospects, but I've always been fascinated by the idea. I've done traditional investing, stocks, bonds, real estate, but I'm looking to diversify and branch out a little. Secondly, I do have the full \$50K and then some if needed. Third, as I said, I'm definitely interested in the opportunity and would like to find out more information to find out if this would be mutually beneficial for all parties involved.

Rob J.

Hello Mr. Jackson,

I want to thank you for taking the time to respond to my posting.

I also want to thank you for being a 'breath of fresh air' when it comes to a response from Craigslist.

You come across as someone who actually took the time to read my posting in it's entirety and understood the proposition.

You would not believe how many responses I get that show the people barely skimmed the posting and don't have a clue.

I am glad to hear that you are highly interested and motivated for an opportunity like this.

I can assure you, it won't come around again - not like this one.

Timing is everything - and being at the right place, at the right time, under the right circumstances, can truly change lives around for the better if the opportunity is seized.

I don't believe in stars lining up, but I do believe in the old metaphor of if Dominos are lined up properly, they can all fall in the direction that WE want, and the results can be amazing.

The Dominos are lined up now, just waiting for the initial investment to make them fall.

The equipment that I already have is waiting in storage to be moved into a shop that needs to be rented and set up to process the raw materials to get the gold and smelt it.

ACC000123
FILE #7998

4/10/2009

The properties are waiting for me and a few carefully selected laborers to gather up the materials and get them to the shop to start the processing and refining.

Over 1.5 BILLION has already been released to start to pave the way to sweet contracts to close and plug mines (of course, I want to get some gold out before I cap them!)

That is just the tip of the iceberg...estimated up to 70 billion will be needed! And there are PLENTY of abandoned mines to go around. There is actually very little competition.

Here is Arizona alone, the ENTIRE mining department budget was only 1.2 million. Not a whole lot to run a state department let alone have the money to close many mines. They were lucky to seal 1 or 2 a year...and those mines were tiny ones. And there are over 1000 MAJOR nasty ones here in AZ...and up to 18,000 minor ones.

Needless to say, they are drooling in anticipation for the fed money!

We may be all just waiting on you - if you are to be the investor that fits the bill, and stands to get your rightful share of the gold.

I just have a couple of questions.

From your response to my posting, are you implying that you have the entire \$50k cash for the total investment requested, or is it a smaller amount and with the appropriate gold amount return for the smaller amount? Just need to know how many pieces of this pie will have to be divided up. Of course, just with one would make life simpler, but I will work with what I have to work with.

I need to clear that up right away as I had one so-called investor that REALLY wanted the 100 pounds of gold...he just had a peculiar way of thinking how he was going to get it.

He only had \$10k, and wanted to invest that...HOWEVER...he then wanted me to use that to get some gold...sell it...give HIM the cash, so he could TURN around and GIVE it back to me, so that his INVESTMENT would TOTAL the \$50K, so that then he would be ENTITLED to the entire 100 pounds!

And he HONESTLY thought that I would have no problem with that. He couldn't see to grasp the concept that what I needed was the full \$50K to make this thing work, and that if I had to get more people involved, he should only expect the return for the amount HE was putting in, not what someone would get if they carried the whole or majority of the load.

Needless to say, I have not heard back from him, after I informed him that wasn't how the posting was worded, or the premise of the investment was meant.

He finally got it, and said, well he would have to go and flip a few more houses to come up with the rest. Like I stated above, I never heard back.

I hate to see how he runs his little real estate business if he couldn't take the time to read and understand a proposal.

I also had a man that said he had the \$50k, but after quite a bit of talking, he tried to get ME involved in an illegal gifting sham. That is how he said HE got his money...and that if I did it, I wouldn't need any investors. Of course, he would expect the 100 pounds of gold for turning me on to his big plan!

I'm far from being an angel, but I don't do illegal money!

Anyway, let me know. And if you could, just a little background on you. Nothing major, just things like are you retired, have you been involved with any mining stuff before....or do you just like gold!

Then, we can start the phone conversations and work on getting together as soon as possible, and I can show you the nitty gritty details.

I am confident that you will like what you see, literally, and then hopefully, we can make this happen.

Thanks again for your interest,

Dr. A.C. West - Geologist, PhD, D.Sc.

President - West Mining and Innovations, Inc.

Subject: Investors Sought for Gold Projects

**** CRAIGSLIST ADVISORY --- AVOID SCAMS BY DEALING LOCALLY**
**** Avoid:** wiring money, cross-border deals, work-at-home
**** Beware:** cashier checks, money orders, escrow, shipping
**** More Info:** <http://www.craigslist.org/about/scams.html>

I'm responding to an investment opportunity that I saw on Craigslist. I'm highly interested and motivated for an opportunity like this and have the liquid capital in hand and ready to go. I would appreciate a response back either via email or telephone if this opportunity still exists.

Thank You

R. Jackson

Mr. West,

I just had an opportunity to check my email and look at the agreement. All looks fine except for my name. You typed "Ronald Jackson" and its Robert Jackson. If you can send me another one reflecting my correct name I will be happy to complete and sign. I also didn't see any additional info included as well and I look forward to being able to read up on it.

I hope your wife is doing better and I should be back in town sometime tomorrow.

Mr. Jackson,

Since it is so late, and I have not heard back from you, I am assuming that you didn't get a chance to download the file or do anything with the ND agreement being away and all.

So, I am going to go ahead and send you the password to unlock the pdf. In a way, I still would appreciate the ND agreement when you get a chance to send it back to me for my record keeping.

Just copy and paste it in when you open the file

Barbie54? Copy this just as it is. Case sensitive and with the ?mark included

Enjoy your reading,

AC

Subject: RE: Address?
 AC,

The address I gave is *Correct* and it's my mailing address. I don't always need to give the box number as the employee's there know me, but if you need it, it's number [REDACTED]. I don't give my personal address to individuals I have never met regardless of whether I'm going to enter into a financial relationship with them or not.

Secondly, as I explained before, I left for California to deal with some family issues. My family will always take precedent to any financial or friendly relationship I have.

Third, benefit of the doubt? You're the one seeking monies, not me. If you want me to invest in your project you'll have patience and respect, and give me the time I need to address my families problems. If my monies are not important to your venture, than I can respectfully bow out. Your decision, just let me know so I know whether this will be something I need to deal with when I return.

From: awest6@[REDACTED]
To: [REDACTED]
Subject: Address?
Date: Thu, 12 Mar 2009 08:23:30 -0700

Mr Jackson,

The address you gave me is the UPS store in that Renaissance Square building . If I sent the stock documents there, who would be designated to sign for them? And, if you have a PO box there, shouldn't there be another number to the address?

Also, since I haven't heard back from you, do I assume that there is a problem, or are we just in a delay pattern?

I do not chase people by calling them.

You said you were sold on my project and were ready to move forward; gave me that address; and then nothing.

What am I supposed to think? I try and give people the benefit of the doubt...that something came up. But not hearing anything just leaves dead air time, and puts a hold on my planning to move on the project..like starting to look for a shop, etc.

I have performed in good faith, and thought you were treating me in kind.

At least an email to inform me what the delay is would be appreciated.

Thank you
 AC

Subject: Re: Gold Opp.
Date: Tue, 10 Mar 2009 08:47:16 -0700

Rob,

Yes I did receive the NDA just fine thank you.

And yes, you will receive Preferred Shares with a rider stating the redemption for gold on the 120th day from the date of investment. That of course is just a formality, as I am fully confident that I will be able to redeem them sooner!

I am glad that you found the reading worthwhile. You have made a very shrewd and savvy investment decision.

If you would, you could send me your complete name and address and I will get the stock certificates and riders prepared and then perhaps we could meet and complete the transaction tomorrow, say around 1 pm at the place of your choosing. Close to a bank for notary services. I bank at Wells Fargo Bank, a very mining friendly bank. But, we can go where you prefer.

I want to thank you again for taking the time to review my material. You are helping a dream become a reality, and I feel that it will not be long, that you will be able to live some new experiences that before you ever answered my posting, you couldn't have imagined. And when you see YOUR gold being poured while white hot into the molds, and watch the processes to refine it, and then finally hold (with 2 hands mind you!) them....well, those memories will last your lifetime!

You are in for an amazing...and very profitable.... journey.

Have a safe trip home, and let me know where and when we will meet. And remember to send me your info for adding to the stock documents.

Take care,
Avison (AC) West

AC,

I checked my email and didn't see a response from you indicating that you received the signed NDA, so, I want to make sure you did? Please let me know if you didn't so I can resend it. I've also had a chance to review your materials that you sent and I'm sold and ready to move forward. My stay in California was a little longer than what I expected, but I should be back sometime this evening. I look forward to hearing back from you and moving forward with this process.

Oh, I did have one question, your ad posting indicated the investor would receive preferred shares of stock in your company. Is this still the case?

Thanks, Rob

Rob,

What a handful you have to deal with. I appreciate you sharing and understanding.

I know this may sound a bit strange, but maybe we were meant to meet. We have a somewhat common thread that we share to some degree. Not exactly the same, but close enough.

I told you that my wife has been a nurse for over 34 years. Well, last May, her left knee started really hurting her. As you can imagine, being a nurse for that long puts a lot of strain on anyone's knees walking on hard hospital floors during those 12-14 hour shifts.

Anyway, she found out she had torn her cartilage in 3 places, and would need surgery to fix take care of those tears. No problem.

Well, she couldn't get in to the surgeon that she wanted for a few months, and finally got it done in early Sept. Well, again, no problem...until a week later when out of nowhere she got chest pain and had to do the ER thing. The initial thought was she had blood clots in her lungs from the surgery.

Turned out she didn't, which was a good thing, but by ACCIDENT the radiologist reading her CT scan saw that her spleen was enlarged, and that her blood platelet count was really low...something that she had never had a problem with. (platelets help with the blood clotting ability)

So, now the alarms went off for cancer or blood disorder. And she had to go thru a TON of tests...some really nasty ones including a bone marrow biopsy from her hip.

The bottom line after all the testing....she did not have cancer or a blood disease. Thank God for that.

But, no one knew what was causing the platelet problem or the spleen enlargement.

So, she has to go to a new doctor and go thru even MORE tests...to find out that she has Cirrhosis of the liver! And, here is the kicker of ironies: Her father was a raging alcoholic, and died from cancer and no cirrhosis.....her daughter is a recovered alcoholic with no cirrhosis....and Barb gets it and was NEVER a drinker!

Needless to say, she went through...and still is to some degree...depressed. There is no cure, but a transplant..which, hopefully is a long way in the future.

However, there IS some things that can be done to help slow the process down.

And I am including some information here that you may want to CONSIDER.

ACC000130
FILE #7998

4/10/2009

There are 2 items to understand.

I know that you said that your uncle is terminal. I do not know how far along he is down that path, but here is something to consider. And I mention this because in my gold processing methodology, PH is a factor.

And, you may not know this...most people other than scientists, or doctors who really get into stretching their learning to include alternative treatments....an old (1933 I believe) Nobel Prize winning doctor discovered that cancer cells CANNOT live in an alkaline environment. Neither can they live in an oxygen rich environment either.

There are now ALKALINE diets being published both on the net and in bookstores. And there are ALKALINE water sources available commercially...whether by buying your own machines, or bottled water.

The idea is to make the body as ALKALINE as possible, thereby STARVING the cancer cells of their ability to grow and multiply.

This is something that I am working on with Barb, and it is to not only her but my health benefits too.

So much of what we normally eat is very ACIDIC and it has been scientifically proven that ALL diseases flourish in ACIDIC environments. It hinders the body's natural ability to fight off disease and degeneration of cells and tissues.

Now, I am NOT claiming any cure for your uncle, but I can tell you with confidence, that IF you can change the diet and water that goes into him to ALKALINE based, it WILL make the cancer SLOW it's growth, and help your uncle FEEL better.

I am also including information on an herbal supplement that I have started Barb on. It is not expensive, and is available in Sprouts, and most decent health food stores.

It is the best combination of liver cleansing, detox, and aid.

A few years back...maybe an early warning...Barb had one liver enzyme that was high. I had her take just Milk Thistle by itself...and after 30 days, the enzyme was back to normal.

Now, I want her not only on that, but a more expansive support for her liver and spleen, which are connected by blood flow.

Hence, I did a LOT of research, and found that this product has the best herbal combination that I could find.

Herbals do not interfere with prescription meds or most anything really. Natural, proven plants and herbs used for thousands of years. So, they are almost always have no side effects to anyone.

Anyway, take a moment to read about the product if you care to. I got the lowdown on all the main ingredients and highlighted them with their therapeutic benefits.

And, though I do not know your religious background, my wife did want me to mention that she says she will keep your uncle...and you and your family...in her prayers.

She has worked as a hospice nurse, and I can assure you, she has been very comforting to all of her patients. And when she says she prays for someone, you can rest assured she does. I don't deserve her, but God blessed me with her!

Well, I've taken up enough of your time. I hope the information I've given helps in some small way.

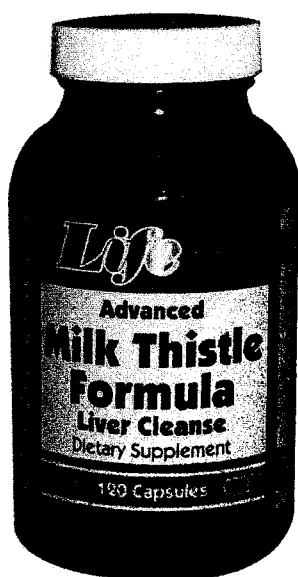

As far as you asking about getting together early Monday afternoon...assuming you can leave...that will work out fine. Just let me know when and where.

Take care,

AC

ACC000131

Milk thistle helps relieve the symptoms of **hepatitis, cirrhosis, and inflammatory liver conditions**. It is one of the most effective herbs known for **relieving liver disorders**.

Many herbalists and medical practitioners believe that milk thistle can help **protect the liver** from damage caused by **alcohol, chemicals, drugs, diseases, and toxic plants**.

Turmeric has long been used as a powerful anti-inflammatory in both the Chinese and Indian systems of medicine.

Dandelion is also used for the treatment of the gall bladder, kidney and urinary disorders, gallstones, jaundice, **cirrhosis**, hypoglycemia, dyspepsia with constipation, edema associated with high blood pressure and heart weakness, chronic joint and skin complaints, gout, eczema and acne. As a tonic, Dandelion strengthens the kidneys. An infusion of the root encourages the steady elimination of toxins from the body. Dandelion is a powerful diuretic but does not deplete the body of potassium.

Research is revealing that the many constituents of Dandelion including Taraxacin, Taraxacoside, Inulin, Phenolic acids, Sesquiterpene lactones, Triterpenes, Coumarins, Catortenoids and Minerals, mainly Potassium and calcium, are very valuable in curing a number of disorders and illnesses.

Dandelion is traditionally used as a tonic and blood purifier, for constipation, inflammatory skin conditions, joint pain, eczema and liver dysfunction, including liver conditions such as hepatitis and jaundice.

Picroliv Picrorhiza kurroa - a perennial woody herb widely used in Ayurvedic medicine to treat a variety of diseases, especially **liver disorders** and respiratory problems. Picroliv® is the standardized extract from P. kurroa and studies have shown that it is capable of **protecting the liver against**

ACC000132

FILE #7998

4/10/2009

chemicals and micro-organisms. The hepatoprotective effects of Picroliv® were found to be more potent than Silymarin (obtained from the seeds of milk thistle, *Silybum marianum*) in maintaining **healthy liver functions.**

Subject: RE: Address?

AC,

No harm, no foul. I understand your thought process and you're right, written words sometimes don't adequately convey the thought process. I do have an ailing alcoholic uncle who is terminal with liver cancer. I just want to make sure he's stable and in a good place before I leave California. Tentatively I'm booked on a redeye for this Sunday and will be back late that night. My intentions are to connect with you early Monday afternoon if that's ok. If I don't respond right away to an email, there's a definite reason why, but not to worry. If early Monday afternoon is ok with you, just let me. Also, thanks for being understanding.

Rob

To: [REDACTED]
Subject: Re: Understood... and a suggestion ..the inserted pic is safe
Date: Mon, 16 Mar 2009 10:30:50 -0700

Rob,

Glad to see you got back ok.

I am not to sure about places downtown, but there is a deli that my wife and I went to a lot that is near the office of her nursing staffing agency. The deli is a big one, with 2 sections, so we could have some privacy.

It is at the cross streets of Central and Earl and it is in the Park Central Mall...a strip mall. The Bank of America tower is on the north end of the parking lot. The deli has 2 entrances...one from the south parking lot, the other from a small open air mall walkway. You can't miss it once you turn into the mall parking lot. The entrance to the mall in on the west side of central.

So, if you're coming north up central, turn LEFT at EARL...into the mall entrance. As you drive west toward the strip mall, you will see the open air walkway just to your left. Park near that and walk into the mall walkway. The Park Central Deli is about 2 Or 3 doors to your left and there you are.

It really is easy to get to once you get there.

I will be dressed casually in shorts and a shirt. You can't miss me because one reason I have shorts on is that I wear 2 leg braces. Easier than getting my legs scrunched under long pants. Someday when I get some new knees, I can chuck the braces, but for now, they do the job. I'm short, stocky, more gray hair than brown, and have my microscope unbilically attached.

My cell croaked, so I will have my wife's with me so if you need to call me enroute, etc., the number is [REDACTED]

We can meet at 2:30 That would work out for me just fine. If you need to make it 2:00, let me know. Other wise, I will be looking for you at 2:30.

Looking forward to meeting you finally!

AC

#10, 11, 13

Nondisclosure and Confidentiality Agreement

This agreement is made as of March 6, 2009 by and between

West Mining and Innovations, Inc., Avison C. West - President (the Company)

and **Robert Jackson** the (Recipient).

The Purpose:

The Company and The Recipient wish to explore a potential business relationship, in which the Company may disclose its Confidential Information (as defined below) to the Recipient, (The Relationship).

Definition of Confidential Information:

Confidential Information means any information, technical data, or know-how, including but not limited to, that which relates to research, product plans, products, services, customers, markets, software, developments, inventions, processes, designs, drawings, pictures, engineering, hardware configuration information, marketing or finances of the Company, which all shall be deemed as Confidential Information.

Nondisclosure of Confidential Information:

The Recipient agrees not to use any Confidential Information disclosed to it by the Company for its own use of for any purpose other than to carry out discussions concerning, and the undertaking of the Relationship. The Recipient will not disclose any Confidential Information of the Company to parties outside the Relationship or to employees of the Recipient other than employees or agents under appropriate burden of confidentiality and who are required to have the information in order to carry out the discussions regarding the Relationship. The Recipient agrees that it will take all reasonable measures to protect the secrecy of and avoid disclosure or use of Confidential Information of the Company in order to prevent it from falling into the public domain or the possession of persons other than those persons authorized under this Agreement to have any such information. Such measures shall include the highest degree of care that the receiving party utilizes to protect its own Confidential Information of a similar nature. The Recipient agrees to notify the Company in writing of any misuse or misappropriation of Confidential Information of the disclosing party, which may come to the receiving party's attention.

Publicity:

The Recipient will not, without prior consent of the other party, disclose any person, the fact that Confidential Information of the Company has been disclosed under this

agreement, that discussions or negotiations are taking place between the parties, or any of the terms conditions, status or other facts with respect thereto, except as required by law and then only with prior notice as soon as possible to the Company.

Return of Materials:

Any materials or documents that have been furnished by the Company to the Recipient in connection with the Relationship will be promptly returned by the Recipient, accompanied by all copies of such documentation or certification of destruction, within (10) days after (I) the Relationship has been terminated or (ii) the written request of the Company.

Patent or Copyright Infringement:

Nothing in this agreement is intended to grant any rights to the Recipient with regard to any and all rights of the Company's rights to patents or copyrights.

Term:

The forgoing commitments of each party shall survive any termination of the Relationship between the parties for a period of three years after application of Section 5 above. Term.

Successors and Assigns:

This agreement shall be binding upon and for the benefits of the undersigned parties, their successors and assigns, provided that Confidential Information of the Company may not be assigned without the prior written consent of the Company. Failure to enforce any provision of this Agreement shall not constitute a waiver of any term hereof.

Governing Law:

This agreement shall be governed by and enforced in accordance with the laws of the State of Arizona and shall be binding upon the Recipient in the United States and worldwide.

Remedies:

The Recipient agrees that any violation or threatened violation will cause irreparable injury, both financial and strategic, to the Company and in addition to any and all remedies that may be available, in law, in equity or otherwise, the Company shall be

entitled to injunctive relief against the threatened breach of this Agreement by the Recipient without the necessity of proving actual damages.

In Witness whereof, this Nondisclosure Agreement is executed as of the date first above written:

The Project

As a geologist that has specialized in the extraction and processing of precious metals over many years, it has become quite evident that mining in the traditional way is both over expensive; over labor intensive; and extremely inefficient.

By explaining some basic principals and then showing you some alternatives, I am hoping to reveal the enormous and extremely prosperous potential of my project.

The most basic premise to understand, is that gold starts out quite large in it's mass as a hardened metallic object, usually forming in veins as the molten magma "injects" it into various rock materials...usually quartz first, then the granite class, and lastly metamorphic materials. The common denominator being water is present to help shape it within the host material.

Gold is 19.43 times **HEAVIER** than water, so as such it will **ALWAYS** seek bedrock...or in other words, gravity will always keep pulling on it trying to take it downward as far as it can go.

This is **VERY** important to understand because it reaches to the heart of my processing approach.

The typical scenario is for a piece of gold to break off from an exposed tip of a vein protruding from a mountain. This can be caused by wind, rain, seismic shock such as an earthquake, etc.

The point is, that a journey now begins that has been occurring since the formation of the continents and creates our gold "deposits".

As gold works its way down the side of the mountain, the friction placed upon it breaks off or grinds away pieces. This keeps happening as long as some force of nature makes it possible for further movement...again, wind or rain, etc.

Pieces keep getting smaller and smaller and gradually are not able to be seen by the naked eye.

But, they **KEEP** getting smaller and smaller, reducing in size into the microscopic and submicroscopic world.

YET, these particles **STILL** retain their molecular mass and composition as **GOLD** particles. These particles can even get **SO SMALL**, that they **LOSE** their physical complete composition....like losing an electron, etc., so that they become incomplete molecule...but one that **CAN** be salvaged. This happens to many other metals too, especially precious metals such as silver, platinum and it's multiple metallic group entities like rhodium, iridium, osmium, and other even more rare earth metals.

The point here being, that this process **NEVER** ended, nor will it **EVER** end. Gold continues to **ERODE** and works its way, both in the physical and subatomic levels, down to bedrock or through the waterways into the oceans.

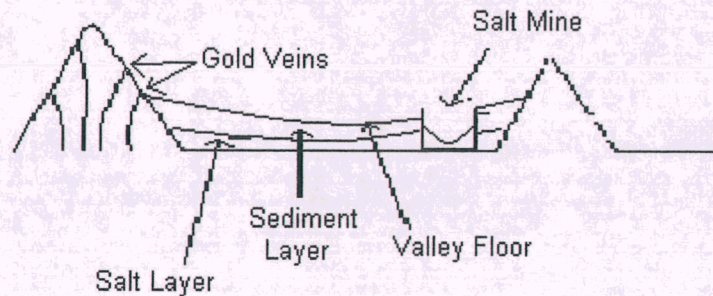

ACC000139
FILE #7998

Example 1

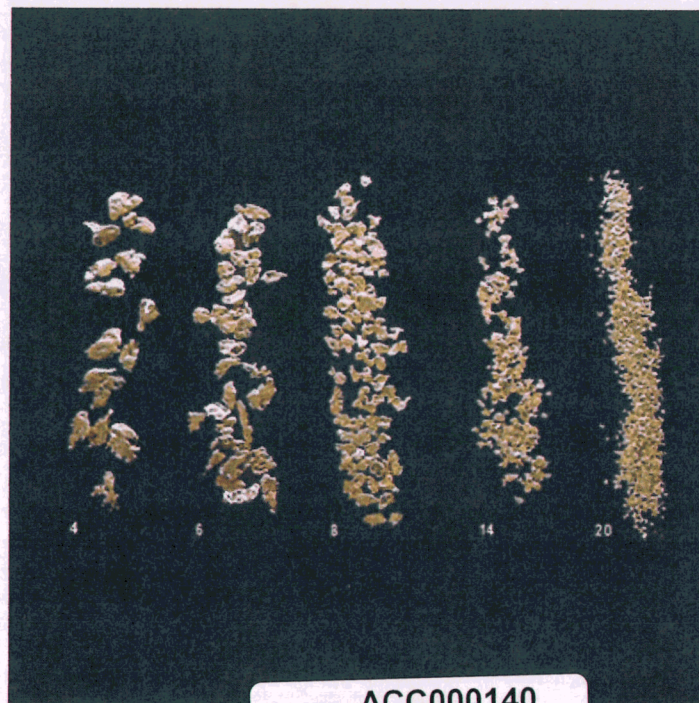

Salt deposits are mentioned in my drawing below, but also apply to waterways and mining traditional mining deposits.

Gold is 19.37 times heavier than water and ALWAYS seeks bedrock.
Rock face erodes gold veins; gold "nuggets" break off and roll downhill.
As "nuggets" move downslope, they wear down and pieces become smaller and smaller.
Veins -> nuggets -> flakes -> grains -> flour gold -> microscopic gold
-> sub-microscopic gold -> sub-atomic gold.
ALL RECOVERABLE AMOUNTS!

It is by recovering all the microscopic and sub-microscopic gold contained in salt deposits, that the ounce-per-ton ratio's can be so much higher than traditional mining methods. Salt deposits are HUGE and have been collecting gold for untold eons just waiting for recovery!

Gold sizes getting smaller and smaller

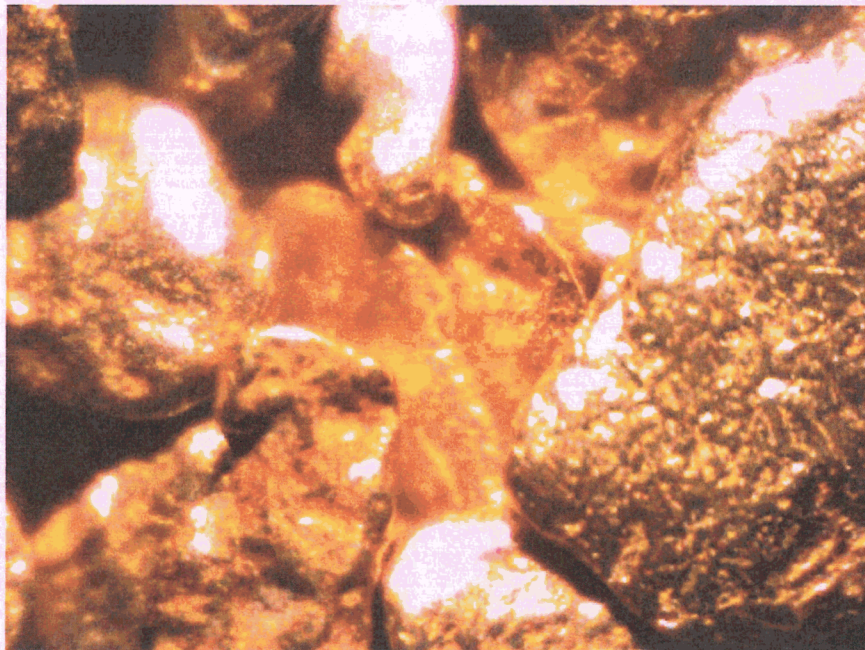

ACC000140
FILE #7998

The reason that I make such a point about how small gold can reduce to, is to understand that it is WORTH working to recover.

Look at it this way: a 1 pound gold nugget that LOSES half its mass due to erosion becomes a ½ pound nugget. A nugget with NATURAL impurities in it.

But there is STILL the other ½ pound of smaller gold that was 'lost', that once recovered, and then smelted, can be poured into a BRAND NEW ½ pound NUGGET worth MORE than the other half, because during the smelting process, IMPURITIES are REMOVED and the PURITY percentage goes UP and makes the NEW nugget/bar worth MORE \$\$\$\$\$.

Gold "dust" under the microscope.

ACC000141
FILE #7998

Water is the most 'corrosive' element in the ground. It mixes with natural acids and bases and will dissolve any metal. Precious metals are, in essence, metallic salts and as water seeps down into the ground from rain and rivers; and also gets forced upward by the heat of the earth below, it will – over time – dissolve them into microscopic and sub microscopic particles.

They dissolve and become 'trapped' in the water tables.

Sometimes, it is hard to believe, but people 'drink' down gold everyday out west without ever knowing it. Fortunately, gold is not a threat to the human body, not like heavy and toxic metals like mercury. It just passes right on through on it's 'journey'. It just took a side track. And, no, it is not something that the water treatment company actively looks for and would try to filter out. Remember, we are talking too small for their filters to capture.

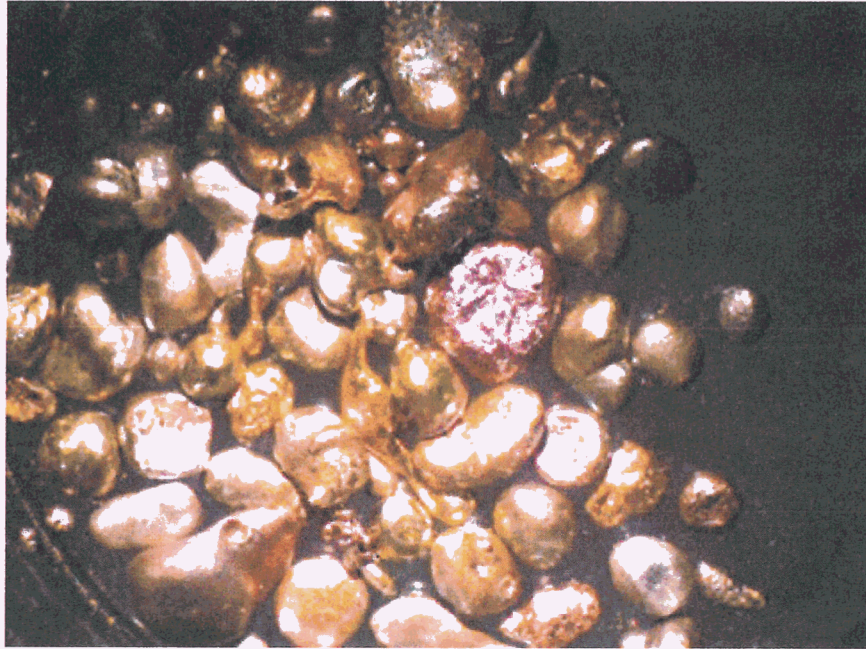

One more bit of info: Due to volcanic activity in gold bearing regions, not only is gold deposited in rock material, but also salt deposits, and certain clays.

In fact, I have been able to recover gold from not only SALT...from a certain area of the USA, but also from a type of clay that not only is used for "kitty litter" but, it is also refined even further for HUMAN consumption as a health food aid.

Think about that for a second or two. Not only can gold be gotten from the ground in traditional gold deposits, but it can be recovered from SALT and KITTY LITTER!

Example 2

**Kitty litter clay gold that I have recovered.
Ready to be refined even further to separate it from the silver and other precious
metal "impurities".**

Example 3

**Gold recovered from SALT that was smelted into small bars.
Still needed to be further refined. This was done a couple of years ago for a client
that has since passed away.**

ACC000143
FILE #7998

I am going to include some step by step pictures that my wife took a while back of me separating the gold bearing particles from some salt. It will show how once the salt is dissolved, by using a proprietary process, I can gather ALL dissolved metals, and start to bring them back into a powder form, which then can be smelted into solid metals once again.

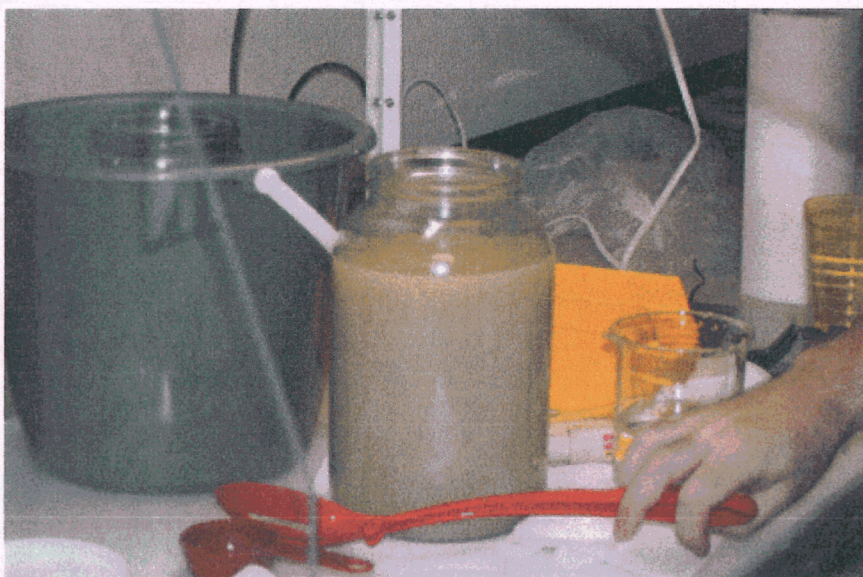

**An organic sulfur compound is poured into the dissolved salt container.
5 pounds of salt was used.**

The ph is reduced by acid to make the process active.

**ACC000144
FILE #7998**

The acid works with the organic sulfur mixture to start the metallic particles to coalesce. Notice the color change.

Now, a base is added to raise the PH which causes the metallic particles to coalesce and begin to enlarge themselves enough for gravity to take effect on them.

ACC000145
FILE #7998

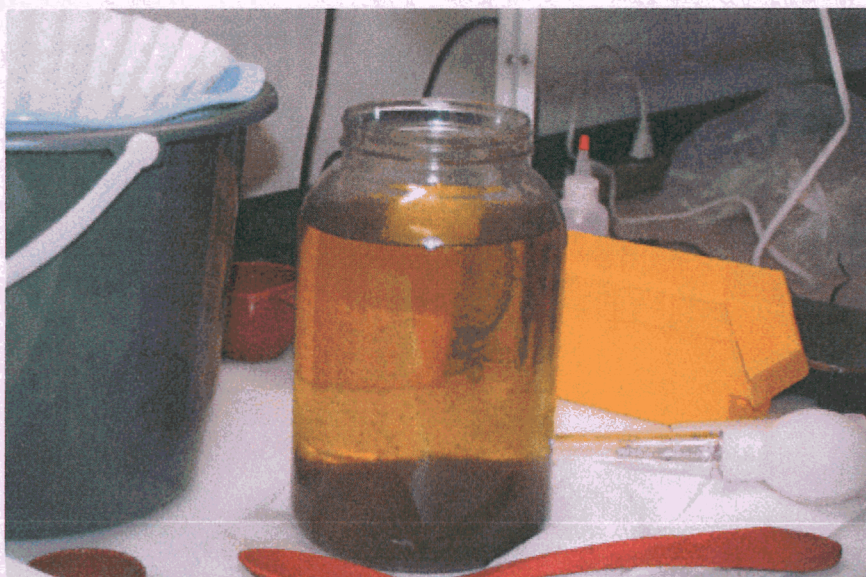

If you look carefully, you can actually see the coagulation of particles into a cottage cheese like material, and notice too, the color changing once again as the PH affects the solution.

The metals are now starting to 'fall' as the process has driven the metals back into a solid mass form out of the dissolved and even partially formed molecular state.

ACC000146
FILE #7998

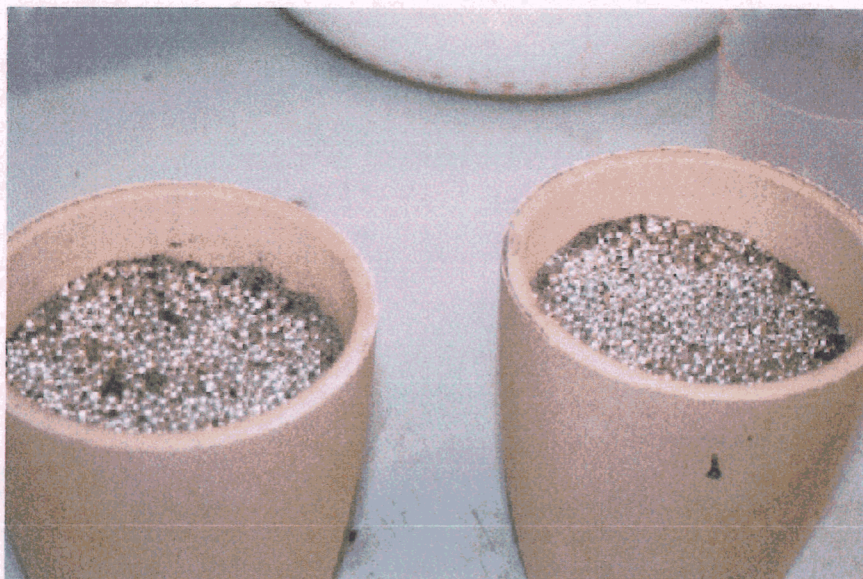

Here are the metals powders formed and settled which can now be filtered, dried, and then smelted.

Here are the powders dried and ready to be mix with a flux material into a crucible.

ACC000147
FILE #7998

The powder has been mixed with a dry flux material. The flux material will pull out impurities from the precious metals in the furnace.

Fine silver 'shot' is added to the mix because it acts as a 'collector' by being able to drop ALL of the precious metals' MELTING POINTS contained in the powder mix down to IT'S level. A very unique property of silver.

Then, once the metals form in the furnace, the metals will separate according to their own specific gravities (weights...i.e. in this case, gold is heaviest, then silver, then copper, etc.), and settle in layers in the molds when it is poured out.

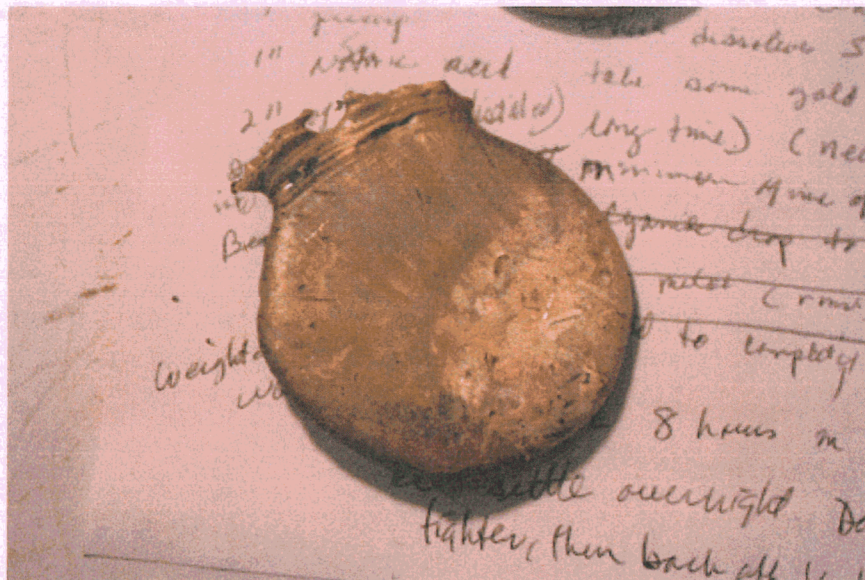

**The crucibles are poured out to cool.
This was done for a client up in Minnesota. They had very cute 'molds'!**

ACC000148
FILE #7998

These are the bars after cooling. Notice the gold that is showing in all three pieces...yes the gold coloring IS gold.

This gives a little more scale of a piece – compare to the handwritten notes.

These three pieces of metal came from 50 pounds of SALT.

**And after refining, these 3 pieces yielded a gold button weighing 5 grams.
5 grams of PURE gold from 5 pounds of SALT!**

This 'test' extrapolated to a recovery rate of 10 ounces of gold per TON of this particular SALT!

ACC000149
FILE #7998

The AVERAGE traditional mining company giant, like Anglo-American – now Newmont, will hard rock mine IF they can get at least a ¼ OUNCE of gold per ton out of ROCK!

So, what does all of this mean to you?

I have taken the time and effort to show these examples to you to prove that DISSOLVED GOLD can be gotten out of WATER. And the more the water is exposed to GOLD bearing material, the more gold will be dissolved in that water, and therefore, be recoverable in LARGER amounts than can be recovered in traditional mining - and with a lot less headaches, costs, and labor.

I have access to one of the most unique mining properties in the west, right here in Arizona, that has over 30 MILES of FLOODED tunnels that is rich in gold and silver bearing water!

With the investment money that I am seeking, I will be able to bring up enough of that water to process and recover the gold AND silver to not only pay the investor the return I offered, but literally - within just a few months - be able to buy the entire mine outright.

The Vulture Mine

Example 1 taken from an Arizona mining report

The Vulture mine in the Vulture Mountains of west-central Arizona is one of Arizona's largest historic gold mines. The mine yielded approximately 340,000 ounces of gold and 260,000 ounces of silver from 1863 to 1942 (White, 1988).

Those numbers were when gold was \$35 an ounce!

The mine is now for sale.

It closed during WWII, as most gold mine operations were forced to by President Roosevelt, and was never reopened. It since has flooded, and now, even though it's main shaft is 3,000 feet deep, one can only reach 600 feet before they hit the water.

This means that with the over 30 MILES of flooded tunnels, there are literally billions of gallons of rich gold bearing waters to process.

There have been a few mining companies that have spent hundreds of thousands of dollars attempting to find a way to 'traditional' mine and reopen activity.

However, it has been determined that it would cost more than triple the costs to even attempt it.

It would almost be an impossible task to not only try to pump out the existing water, but there is no way to stop the re-flooding from occurring.

That is the problem with many mines. They don't run out of gold reserves, they flood out and force the mines to close.

It is also worthy to note, that after all the money has been spent assessing how much gold there is left, it was estimated that only 40% of the actual gold in the Vulture mine was mined. The rest remains buried, not only in the walls, but in the actual supporting pillars within the tunnels!

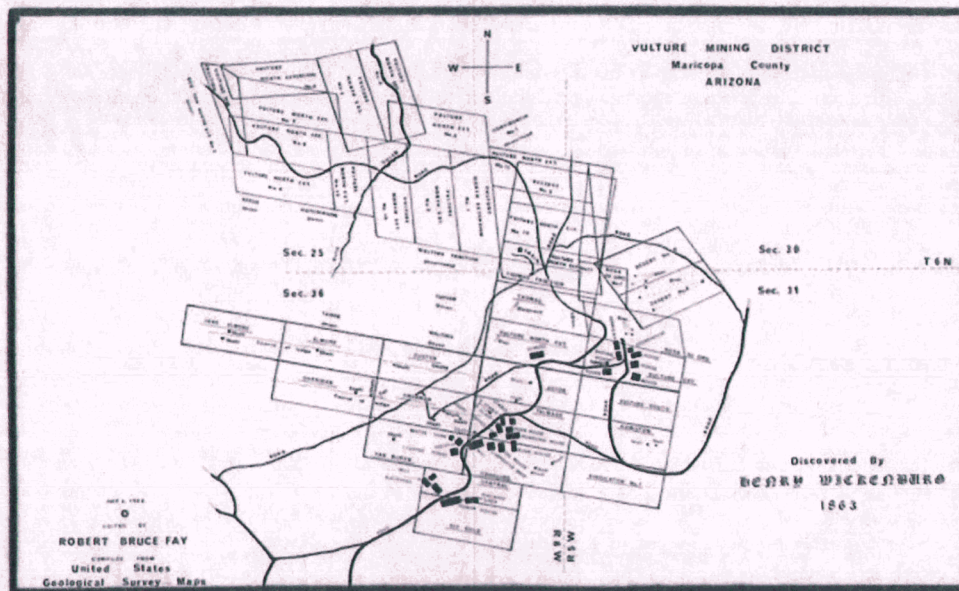

In fact, the assay office building remains that are still standing, contain an estimated \$600,000 in gold in the very stones that make of the building!

**Example 4
The assay building**

The ebbing and flowing of the water in the flooded sections of the mine created by the moon's gravitational pull, acts as an acidic wash helping to accelerate the dissolving of the gold in the pillars and walls within the mine. This keeps the water's gold saturation levels much higher than just standing water would. This just adds to the gold ppm count that is recoverable.

Example 5
Location and layout of the Vulture Mine

VULTURE
GOLD
MINE

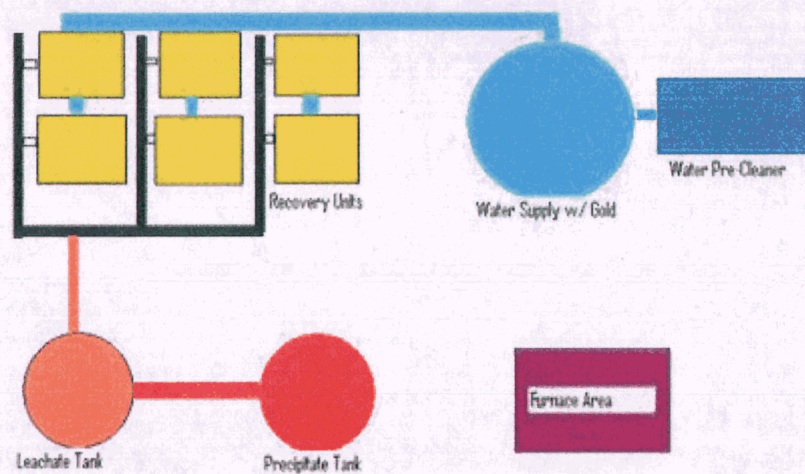

HISTORICAL ARIZONA

My primary project is to pump and process water from the Vulture mine. However, there are over 1000 abandoned mines in Arizona that ALSO are flooded, and should ANY problem occur with access to the Vulture mine before I am able to pay you your 100 pounds of gold as agreed upon in return for your \$50K investment, I would be able to gain access to through the Arizona Bureau of Mines or the federal Bureau of Land Management (BLM) that also contain gold enriched waters.

(As stated in my posting, my secondary interest is pursuing the acquisition of abandoned mine sealing contracts as they become available from the government stimulus money being funneled to the Department of the Interior, which oversees the mining industry both federal and state.)

But, for our purposes, the relatively quick and more prosperous endeavor is the processing of mine flooded waters.

Example 6
The basic recovery flow chart

ACC000153
FILE #7998

Pumping and filtering equipment examples that will be obtained for recovery.

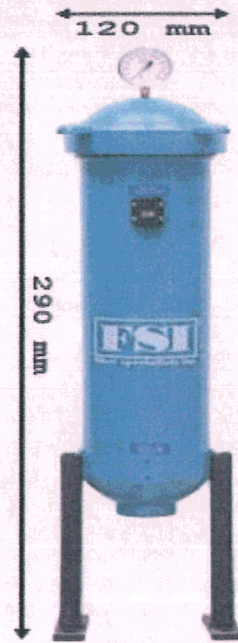

Example 5

These type of filters utilize unique filtering materials that can recovery in the micron levels.

They capture not only visible, but invisible gold that can be chemically removed and then processed as in the examples I showed earlier in this document.

This makes sure that ALL the possible gold contained in the mine waters is recovered.

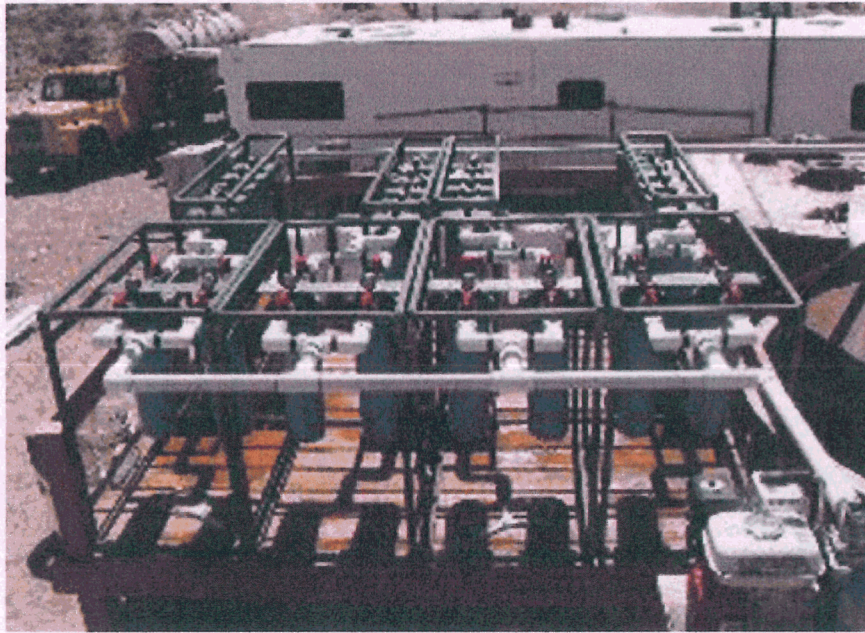

Example 7

ACC000154
FILE #7998

Example 8

Connecting a series of filters together to remove invisible gold after visible has been removed with prefilters.

Conclusion

I hope this has given you some idea of what this project is all about.

I have tried not to get too technical, and I know this may have been a bit “long winded” as my wife advised me NOT to do.

However, I felt I needed to make sure that you understood that this is a very VIABLE project, and that I know what I am talking about. Understanding how gold gets to where we can get at it is important.

Knowing about the mine where the gold is going to be coming from is also important.

There is a tremendous opportunity here for the both of us.

Time is a factor in making this happen. I do not think I have to worry about anyone stepping in and buying the mine before I can get it. What I do is NOT a widespread approach to miningYET. And I have a few very proprietary steps in the recovery process that NO ONE HAS, so I have the advantage there.

But, as in anything, someone COULD try and grab the mine for other purposes if we delay. It is a tourist stop now.

ACC000155

FILE #7998

There is always that risk. Of course, there are secondary flooded mines to go to if necessary, but this one is so sweet and close by.

This is Arizona, and it gets HOT here very quickly. Summer will be here before we know it and I would prefer to have been able to be operating at full capacity before the heat settles in. In other words, just having to be out in the heat long enough to be replacing loaded filters with empty ones and heading back to the shop for processing, and not still be building the system up.

I hope this gives you some late night reading material. I apologize for not getting this done sooner. Kind of got behind on things with Barb and the hospital stuff.

Let me know if there is anything else I can do for you. And have a safe trip home.

UNIQUE OPPORTUNITY

**The Vulture Gold Mine - Wickenburg, Arizona***A historic 1863 Ghost Town*

Private property preserve surrounded by over 140,000 acres of Federal land

The town consists of various historic buildings, homes and mining structures Refer to Ariz. Highways Magazine of June '95 and Nov. '99 or any mining history book.

Established in 1863 by Henry Wickenburg and operated continually until 1942.

Largest producing gold mine in Arizona's history.

Several mining companies have leased for exploration and all reached the same conclusion There is "lots of gold left, perhaps more than was removed in all the past operations, but costly to remove Nearly 40% of the rich ore is still in place as support columns in the many miles of tunnels, The main shaft (3,000 feet deep) connects the vest network of underground tunnels and rooms. The mine is flooded below the 600 ft. level.

We hold fee simple title to the twelve patented claims offered in this opportunity Approximately 240 acres (plus or minus) are offered and several thousand adjacent acres are available for claims (non-patented).

On-site registered well produces plenty of good water. Water level is 400 feet and has not been pumped dry

Situated in rolling foothills 12 miles south of Wickenburg on the Vulture Mine Road Newly

ACC000157

FILE #7998

paved all the way from Wickenburg to the front gate and all the way south to interstate 10.

Tourists tours now consist of self guided tours of the buildings and mine sites of interest.

Price - \$6.5 million cash All offers welcome

1 EXAMINATION UNDER OATH OF AVISON CLARENCE WEST
2 was taken on May, 27, 2009, commencing at 12:10 p.m., at
3 the Arizona Corporation Commission, Securities Division,
4 Third Floor, Phoenix, Arizona, before GARY W. HILL,
5 Certified Reporter No. 50812 for the State of Arizona.

6 The witness testified via teleconference.
7
8
9

10 APPEARANCES:
11

12 For the Securities Division:

13 Mr. Phong Paul Huynh, Staff Attorney
14 1300 West Washington Street, Third Floor
Phoenix, Arizona 85007
15

16 For the Respondents:

17 Mr. Avison Clarence West, In Propria Persona
18 [REDACTED], Arizona [REDACTED]
19

20 ALSO PRESENT:

21 Mr. Matt Shumaker,
22 Registered Professional Geologist
23
24
25

1 (Exhibits 1 through 8 were marked for
2 identification.)

3 MR. HUYNH: This is part of an inquiry by the
4 Securities Division of the Arizona Corporation Commission
5 in the matter of West Mining and Innovations,
6 Incorporated, and Avison C. West and Barbara West, husband
7 and wife, Docket Number S-20661A-09-0108, in order to
8 determine if there has been full compliance with the
9 Securities Act of the State of Arizona. The information
10 obtained today may reveal violations of statutes outside
11 the Securities Act.

12 Persons present are myself -- I'm Paul Huynh --
13 Staff Attorney for the Securities Division. I also have,
14 on loan from the Bureau of Land Management to assist, Matt
15 Shumaker, senior geologist. Some of Mr. Shumaker's
16 qualifications are Registered Professional Geologist,
17 Arizona, 22228; Certified Professional Geologist, American
18 Institute of Professional Geologists, CPG 7319; Certified
19 Mineral Examiner, U. S. Forest Service, 038; Certified
20 Mineral Examiner, U. S. Bureau of Land Management, 0042;
21 Certified Review Mineral Examiner for the U. S. Bureau of
22 Land Management, 028.

23 Now, Mr. West, you're calling in as a result of
24 a subpoena for examination under oath issued and served on
25 you by the Securities Division, correct?

1 THE WITNESS: Yes.

2 MR. HUYNH: Okay. And I'm going to ask the
3 reporter to swear you in at this point in time.

4

5 AVISON CLARENCE WEST,
6 called as a witness herein, having been first duly sworn
7 by the Certified Reporter to speak the truth and nothing
8 but the truth, was examined and testified telephonically
9 as follows:

10

11 EXAMINATION

12 BY MR. HUYNH:

13

14 Q. Mr. West, I'm going to go through a couple usual
15 advisories I provide to examination witnesses. You have
16 the right to refuse to answer questions if you think the
17 answer may tend to incriminate you. By incriminate, I
18 mean subject you to possibility of criminal prosecution.

19 Now, you have the right to be represented by
20 legal counsel. Currently you are not represented by an
21 attorney; is that correct?

22 A. Correct.

23 Q. Are you ready to proceed today without an
24 attorney to counsel you?

25 A. Yes.

1 Q. Okay. If at any time you feel you need legal
2 counsel, please tell me immediately, and we can end this
3 session and allow you to obtain an attorney. Until you
4 tell me to stop for that reason, it will be assumed that
5 you're waiving your right to counsel at the present time.

6 Now, since we are doing the testimony
7 telephonically, I would like you to speak clearly for us
8 and also wait a second until the question is fully asked
9 so we don't interrupt each other. I'll also wait a couple
10 seconds after you answer to make sure that, you know, we
11 received all the statements or responses that you made
12 clearly.

13 If you don't clearly hear a question or don't
14 understand what's being asked, please let me know, and the
15 reporter can repeat it or I'll explain the question
16 further.

17 Now, if you need to go off the record for any
18 time, please let me know, and, you know, we can go off the
19 record upon my direction.

20 Since you are now under oath, any false
21 statements you make knowingly can subject you to
22 administrative penalties by this agency, as well as
23 criminal prosecution as perjury or false swearing, both of
24 which are felony offenses in Arizona.

25 Do you understand that you're under oath here

1 today?

2 A. Yes.

3 Q. All right. Do you have any questions about
4 anything I've said so far?

5 A. No.

6 Q. Do you understand what I've stated to you?

7 A. Yes.

8 Q. Now, are you on any medication or under any
9 physical disability that might interfere with your memory
10 or your ability to understand and answer questions today?

11 A. Yes.

12 Q. What medications or disabilities?

13 A. Disability from -- well, I'm disabled for one
14 thing, but primarily because of the fact that in 2006, I
15 suffered a heart attack. I had a quadruple bypass heart
16 surgery that I have sporadic memory holes. And I'm also
17 on medications, Valium and also (unintelligible)--

18 Q. Could you say that last drug again?

19 A. Alprazolam. The brand name would be Xanax.

20 Q. What's the dosage amount for each of those
21 medications?

22 A. Five milligrams of Valium and .25 milligrams of
23 Xanax.

24 Q. And have those medications affected your memory
25 in the past?

1 A. Not so -- I don't know if they themselves, but
2 sometimes they make it difficult for me to grasp something
3 quickly.

4 Q. Have you reported this --

5 A. And I do suffer from a panic attack or panic
6 disorder, and I am under a tremendous amount of stress
7 over my wife's health. So I'm a little sporadic right
8 now.

9 Q. Are you having any memory loss issues as we
10 speak right now?

11 A. I would not be able to tell you.

12 Q. And is there anything currently right now that's
13 affecting your ability to understand and answer my
14 questions at this point in time?

15 A. At this point in time, no. But if I do have a
16 problem, I will let you know.

17 Q. Okay. Have you reported any memory losses to
18 your doctor?

19 A. I do not know. My wife might have because she's
20 a nurse and she does know of these lapses.

21 Q. Okay. Mr. West, I'm going to ask a couple
22 questions regarding your identity, obviously, since you're
23 doing this telephonically. Could you please give me your
24 full name, including your middle name or initial?

25 A. Avison Clarence West.

1 Q. Have you ever used any other name?

2 A. I have a short version, Avi, or I go by first
3 and middle initials, A.C.

4 Q. What is your date of birth?

5 A. April 4 -- excuse me, [REDACTED].

6 Q. What is your current home address?

7 A. [REDACTED] Arizona [REDACTED]

8 Q. And how long have you lived there?

9 A. Since the second week of January of this year,
10 2009.

11 Q. Do you rent or own that residence?

12 A. Just subletting.

13 Q. Mr. West, do you have your driver's license
14 available with you?

15 A. Yes.

16 Q. Could you pull that out real briefly?

17 A. I have it.

18 Q. Could you give me your driver's license number?

19 A. [REDACTED].

20 Q. Okay. And the last item, again just for
21 identification purposes, can you provide me your Social
22 Security number?

23 A. [REDACTED]

24 Q. Thank you. Prior to the current [REDACTED] address,
25 where did you live prior to that?

1 A. In Mesa.

2 Q. How long had you lived in Mesa?

3 A. I think five months.

4 Q. How long have you been a resident of Arizona?

5 A. Since December of 2005.

6 Q. And has your wife been a resident of Arizona the
7 same time as you?

8 A. Yes.

9 Q. And just to confirm, could you give me the full
10 name of your spouse?

11 A. Barbara M., as in Mary, West.

12 Q. Mr. West, what is your occupation?

13 A. I'm disabled.

14 Q. And how long have you been -- are you on
15 disability?

16 A. Yes.

17 Q. How long have you been on disability?

18 A. Since 1991.

19 Q. Are you currently involved in any business
20 ventures or enterprises?

21 A. No.

22 Q. And prior to 1991, what work did you do or who
23 was your previous employer?

24 A. Various, but primarily it was in sales, and I
25 was also in nuclear medicine.

1 Q. Mr. West, can you confirm for me your
2 educational background?

3 A. In what regard?

4 Q. Can you give me, again, from -- let's just go
5 into as it deals with your doctor of science degree, your,
6 I believe, PhD.

7 A. PhD is a doctorate of divinity.

8 Q. Where did you obtain that from?

9 A. From the Universal Life Church in California.

10 Q. And when did you obtain it?

11 A. Last year.

12 Q. What classes did you take to obtain that degree?

13 A. It was a study course with them. I was ordained
14 as a pastor through them, and also through my studies I
15 was awarded the doctorate.

16 Q. How much did the degree cost?

17 A. I don't remember.

18 Q. Do you have a rough estimate, ballpark?

19 A. Two hundred dollars maybe. That's an estimate
20 only.

21 Q. Okay.

22 A. But it was accredited.

23 Q. Okay. And you said it was accredited?

24 A. Yes.

25 Q. By who?

1 A. It's valid. The Universal Life Church is
2 accredited to issue degrees.

3 Q. Academically accredited?

4 A. As far as I know, yes.

5 Q. And do you know by who?

6 A. No, not offhand.

7 Q. And was there any required coursework for you to
8 obtain that doctor of divinity?

9 A. I don't remember offhand. I'm -- as much as I
10 wish I could continue as such, I think I'm going to have
11 to go the route of requesting counsel because I am not --
12 I'm under too much stress with my wife, and I'm not -- I
13 don't have specific data here to answer the questions that
14 you're asking.

15 Q. These are just general background questions,
16 Mr. West.

17 A. But I'm under a tremendous amount of stress with
18 my wife.

19 Q. Okay.

20 A. She might have cancer, and she's very sick, and
21 it's been just a very stressful time where her life is
22 concerned and with my own health. I just -- I don't feel
23 comfortable. I mean it's not a matter of noncompliance,
24 not wanting to comply. I just don't feel that I could
25 adequately speak for myself at this point.

1 Q. You understood that you had the right to have
2 counsel present today?

3 A. I understand. I have made my best effort. If
4 you remember, I offered to try and come down there. But I
5 am not -- I'm not functioning like I should. I'm just
6 under -- it's been a very difficult last couple weeks with
7 a tremendous amount of pain and stuff my wife has been
8 going through, and now what she still has to go through.
9 We don't have the answers on the -- it's just agony, and
10 when my stress goes up, I just have a harder time
11 organizing facts and things of that nature; and I'm in the
12 environment of a hospital.

13 Q. Okay. Mr. West --

14 A. That's what I think I need to do.

15 Q. Okay. Mr. West, so you will be obtaining
16 counsel then?

17 A. Yes.

18 Q. Okay. When will you have counsel obtained?

19 A. I will start making phone calls tomorrow. I
20 hope within a week.

21 Q. Okay. All right. So within a week I should
22 hear from one of your attorneys?

23 A. Yes.

24 Q. Okay. And then understand that -- we are ending
25 today because of your request, but understand that I am

1 not releasing you from the subpoena for testimony or your
2 obligation to give further testimony as required by that
3 subpoena. You do remain subject to recall. So once we
4 coordinate with your counsel, I do expect and anticipate
5 to call you back. You understand?

6 A. Oh, I understand perfectly. Like I said, this
7 is not an adversarial response. It's something where I
8 realize my own limitations, and it's not favorable; but I
9 think that's just the best way to handle it right now.
10 There's too much stress, and my wife's -- I can't
11 really -- I'm not doing either one of us justice by trying
12 to pursue it at this point.

13 Q. Because you're having difficulty recalling or --

14 A. It's a combination of all of that, and I'm in a
15 hospital.

16 Q. Uh-huh.

17 A. I mean I'm waiting for my wife to come up. I've
18 seen her, in and out. I've talked to her doctor, and I'm
19 waiting for her to come back up to her room, waiting for
20 the oncologist to come in, because they're doing a liver
21 biopsy. I just don't feel that I can answer adequately,
22 and I'm a very detail-oriented person. I want to get
23 things right.

24 Q. Okay. Okay. All right. So with that, we will
25 again end today's session; but like I said, I do still

1 reserve the right to recall you, and we'll coordinate and
2 communicate and get that rescheduled. All right?

3 A. I'm in perfect agreement.

4 Q. Okay. Thank you.

5 A. Thank you.

6 (The examination under oath adjourned at 12:25 p.m.)

CERTIFICATION

I, Mark Dinell, certify that I am the Assistant Director of the Arizona Corporation Commission's Securities Division and that I have legal custody of the records of the Securities Division. I certify that I have directed a diligent search of the Securities Division records and the records reflect that during the period of January 1, 2009 to May 18, 2009, Avison C. West has not registered with the Arizona Corporation Commission as a securities salesman or dealer pursuant to Article 9 of the Securities Act of Arizona (A.R.S. § 44-1941 *et seq.*); and has not made a notice filing or licensed with the Arizona Corporation Commission as an investment adviser or investment adviser representative pursuant to Article 4 of the Arizona Investment Management Act (A.R.S. § 44-3151 *et seq.*)

IN WITNESS WHEREOF, I HAVE HEREUNTO SET MY HAND AND AFFIXED THE OFFICIAL SEAL OF THE ARIZONA CORPORATION COMMISSION, AT THE CAPITOL, IN THE CITY OF PHOENIX, THIS 19th DAY OF May, 2009.
